Shrub. Australian Plant Image Index, photographer Murray Fagg, Loughnan Nature Reserve east of Hillston

## Common name

Streaked Wattle, Narrow Lined-leaved Acacia

## Family

Fabaceae

## Where found

Dry **forest**, **woodland**, **mallee**, and shrublands. Western Slopes mainly west of the Olympic Highway.

## Notes

**Shrub** 0.5–2 m tall. Fleshy seed stalks/**arils**. Bark smooth, grey. Branchlets more or less cylindrical, sparsely to densely hairy, often resinous. 'Leaves' **alternating** up the stems, somewhat crowded, 0.7–2 cm long, 1–4 mm wide, hairless to hairy, sticky, with a prominent resinous longitudinal **vein** close to the upper margin, margins thickened, tips somewhat pointed, often with a curved, sometimes almost hooked, **mucro**. Flower **heads** yellow, 2.5–5 mm in diameter, 10–18-flowered, globular, single or in pairs. Flowering: August–October. Pods strongly curved or twisted, usually hairless and sticky, sometimes covered in **glandular** hairs.

Family was Mimosaceae.

Rare Vic.
