## Common name

Gum vine

## Family

Aphanopetalaceae

## Where found

**Forest, woodland**, and along streams. Coast, ranges, and the eastern edge of the tablelands.

## Notes

Straggling **shrub** or climber to 5 m high. Stems 4-angled, hairless, with raised **lenticels**. Leaves opposite each other, 3-10 cm long, 15-40 mm wide, green and glossy, lower surface paler, margins scalloped to toothed. Flowers clove-scented. Flowers with 0 or 4 **petals**, and 4 petal-like **sepals**. Petals, if present, cream, 1-3 mm long, Sepals greenish white to pale green, sometimes tinged reddish, 5-12 mm long. Flowers single or in few-flowered clusters. Flowers Spring.

Family was Cunoniaceae.

Vulnerable Vic.
