

# Plants of South Eastern New South Wales

Flowering stem. Photographer Mkeybear, Mt Imlay south west of Eden

Leaf. Photographer Peter Woodard, Mt Imlay south west of Eden

Shrub. Photographer Peter Woodard, Mt Imlay south west of Eden

## Common name

A boronia

## Family

Rutaceae

## Where found

**Woodland** on a ridge top. Mt Imlay, south west of Eden.

## Notes

**Shrubs** to 1 m high. Branchlets often ridged, hairy, **glandular**-warty. Leaves aromatic when rubbed, opposite each other, 1.6–2.6 cm long, 13–29 mm wide, **compound**, with 7–11 leaflets each 0.35–1.6 cm long, 1–4 mm wide, **terminal** leaflet shortest, surfaces often glandular warty, sparsely hairy at least on the lower leaflets, lower surface paler than the upper surface, margins flat, finely toothed, tips pointed or blunt. Flowers pale to deep pink or white, with 4 **petals** each 5–7.5 mm long. Petals overlapping each other in bud, falling early. 8 **stamens**. Flowers in 1–9-flowered clusters. Flowers mainly from September– December.

Protected NSW.
