Shrub. Australian Plant Image Index, photographer Peter Ollerenshaw, Kemps Creek

Common name

A parrot-pea

Family

Fabaceae

Where found

Woodland, **shrubland**, and **heath**. Coast and ranges north from west of Jervis Bay. One site on the tablelands north of Michelago.

Notes

Shrub to 1 m tall. Stems hairy. Leaves **alternating** up the stems, 0.4-1.2 cm long, **linear**, sometimes broad near the tips, tips blunt to pointed, often curved, surfaces hairless or hairy near the tips, and smooth or occasionally covered with minute warts. Standard petal 7-10 mm long. Flowers pea shaped, with 5 **petals**, 2 joined together to form the **keel**, orange to yellow with red markings. **Calyx** tapering gradually towards the base. Flowers single or paired, at the ends of the stems or at the base of the upper leaves.

In all species of *Dillwynia*, the **standard** petal is much broader than long.

Vulnerable NSW. Provisions of the Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.
