## Common name

Forked sundew

## Family

Droseraceae

## Where found

Rocky ledges and seepage lines in rock-faces, stream banks, and in swamps. Coast, ranges, and the eastern edge of the tablelands north of Braidwood. Coast and ranges south from Wadbilliga National Park.

## Notes

**Perennial** herb to 0.50 m high, with very short stems, **rhizomatous**, **stolons** often present. Flower stalks hairless. Leaves basal, **erect**, usually forked once, the lobes **linear**, 2–10 cm long, coiled when young, with **glandular** hairs that trap insects. Flowers white, with 5 **petals** each 9–14 mm long. Flowers in 1 or 2 clusters, up to 3-branched, each branch with 15–30 flowers. Flowering: spring to autumn.
