

Plants of South Eastern New South Wales

Line drawings. d. plant; seed; seedling flower head. M. Mbir, National Herbarium of Victoria, © 2021 Royal Botanic Gardens Board

Common name

Daisy Fleabane

Family

Asteraceae

Where found

Woodland and rocky sites. Kosciuszko National Park.

Notes

Perennial herb to about 1 m high, with **annual** stems. Stems hairless, minutely sticky hairy below the flower **heads**. Leaves **alternating** up the stems, 2–13 cm long, 3–12 mm wide, margins sometimes purplish, margins **entire** or the lowermost leaves toothed. Flower heads with many pale purple to white '**petals**' in one to several rows, each 1.5–8 mm long, more or less **erect**. Flower heads below the 'petals' 3–8 mm long, 10–20 mm in diameter, hemispherical or bell-shaped. Flower heads in open clusters, appearing single. Flowering: Jan.–Apr.

Vulnerable Vic.
