Common name

Brown stringybark

Family

Myrtaceae

Where found

Forest, woodland, heath, and coastal headlands and dunes. South of Pambula. Coast, ranges, and tablelands.

Notes

Tree to 40 m tall, sometimes a multi-stemmed **shrub** on exposed sites. Bark rough on all but the smallest branches, stringy, grey to

brown-grey. **Juvenile** stems rounded in cross section, rough at first. Juvenile leaves opposite each other for a few pairs, stalkless to shortly stalked, 2.5-10.5 cm long, 13-75 mm wide, glossy green, the first few leaves rough, upper leaves smooth. **Adult** leaves **alternating** up the stems, 6-15 cm long, 15-55 mm wide, glossy green. Flowers white, with 0 **petals**. Flower clusters 7-15 flowered. Mature flower buds 5-10 mm long, caps shorter than the base. Flowers winter-summer. Gumnuts 6-18 mm in diameter. Gumnuts that have dropped their seed have protruding **valves** or valves that are not very noticeable.
