Common name

A Goodenia

Family

Goodeniaceae

Where found

Woodland, grassy areas, and other open sites. Western Slopes. Occasionally elsewhere.

Notes

Annual or **perennial** herb to 0.3 m tall, **prostrate** to sprawling. Stems hairless or with **cottony** hairs. Leaves basal and **alternating** along the stems. Basal leaves 3-9 cm long, 7-11 mm wide, narrowing towards the base, margins wavy to lobed. Stem leaves smaller, broader, not narrowing, with a basal lobe on one side. Leaves almost hairless, toothed to lobed. Flowers yellow, 10-18 mm long, tubular, the tube split to the base, 2-lipped, with 5 lobes. Flowers on stalks to 35 mm long, appearing single, in leafy elongated clusters. Seeds oblong to elliptic, about 3 mm long, brownish, more or less bristly.
