Flowering stems. Australian Plant Image Index, photographer Murray Fagg, Australian National Botanic Gardens, Canberra, ACT

Shrub. Australian Plant Image Index, photographer Peter Ollerenshaw, Wee Jasper Cave near Yass

Common name

Wee Jasper grevillea

Family

Proteaceae

Where found

Shrubby **woodland** on limestone outcrops and around sink holes and cave entrances. Wee Jasper area and near Lake Burrinjuck.

Notes

Shrub to 2.5 m high. Leaves **alternating** up the stems, 1–3.5 cm long, 3–10 mm wide, hairless, margins **entire** and curved down. Flowers with 4 '**petals**' joined together in pairs, '**petals**' green to cream, pinkish near the curve, hairless outside, **bearded** usually above the middle inside. **Gynoecium** 16–18 mm long, **style** pink to red, hairless. Flowers in much branched oval clusters, often curved down or hanging down, 2–3 cm long. Flowering: mostly winter to spring, possibly autumn.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.

Endangered Australia. Critically endangered NSW. Provisions of the NSW Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.

Sensitive Species list NSW.
