

Plants of South Eastern New South Wales

Common name

A grevillea

Family

Proteaceae

Where found

Dry **forest**. Blue Mountains National Park south of the Great Western Highway. Also near Tahmoor.

Notes

Shrub to 1 m high. Leaves **alternating** up the stems, 1–3 cm long, 1–5 mm wide, often varying greatly in size on a plant, margins **entire**, rolled to curved down, upper surface coarsely granular; lower surface **silky**, often obscured by the margins on smaller leaves. Flowers with 4 '**petals**' joined together in pairs, '**petals**' green to cream, almost hairless to covered in loose hairs outside, **bearded** inside adjacent to and above the **ovary** for about 2 mm. **Gynoecium** 12.5–17.5 mm long; **style** white to cream, hairy. Flower clusters 12–20-flowered, **erect, umbel**-like, stalkless or almost so. Flowers mostly winter and spring, also at other times.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.
