

Plants of South Eastern New South Wales

Flowering branches. Photographer Don Wood, Namadgi National Park, ACT

Shrub. Australian Plant Image Index, photographer A Lyne, near Wee Jasper

Line drawings. c. leaf (undersurface view); flower (longitudinal section). G. Thonlinson, National Herbarium of Victoria, © 2021 Royal Botanic Gardens Board

Common name

Woolly grevillea

Family

Proteaceae

Where found

Forest, woodland, heath, and moist rocky places. Widespread. Coastal records mostly south of Eden.

Notes

Spreading shrub to 2 m high. Branches hairy with grey to rusty hairs. Leaves **alternating** up the stems, 0.5–4 cm long, 0.7–5 mm wide, flat, sometimes almost cylindrical, upper surface hairy becoming finely rough, lower surface hairy, often concealed, margins **entire** and curved to rolled down. Flowers with 4 'petals' joined together in pairs, 'petals' dark red to pinkish at the base and green to cream above, hairless and often **glaucous** outside, **bearded** usually above the middle inside. **Gynoecium** 13–20 mm long; **style** pink to red, hairy with fine hairs for the lower two-thirds. Flowers clustered. Flowers Winter to Summer.

Hybridises with *Grevillea alpina*. Occasionally hybridises with *Grevillea arenaria* and *Grevillea rosmarinifolia* subsp. *rosmarinifolia*.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.

All native plants on unleased land in the ACT are protected.
