

Plants of South Eastern New South Wales

Flowering stem. Australian Plant Image Index, photographer Murray Fagg, Australian National Botanic Gardens, Canberra, ACT

Shrub. Australian Plant Image Index, photographer Joe McAuliffe, Morton National Park

Common name

Wingello grevillea

Family

Proteaceae

Where found

Dry **forest**, **woodland**, and **heath** in seasonally wet sites on sandstone shelves. Tallong-Wingello area, ENE of Goulburn.

Notes

Shrub to 1 m high. Leaf tips usually sharp. Leaves **alternating** up the stems, 1.5–4 cm long, mostly 1–4 mm wide, upper surface smooth, lower surface **appressed** hairy, margins **entire** and angularly curved down, sometimes obscuring the lower surface apart from the **midvein**. Flowers with 4 '**petals**' joined together in pairs, '**petals**' reddish, loosely appressed hairy outside, **bearded** inside. **Gynoecium** 19.5–21 mm long; **style** reddish, hairless except for short **erect** hairs near the tips. Flower clusters 10–12 flowered, tending to be one sided, 1.5–3 cm long. Flowering: all year.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.

Endangered Australia. Vulnerable NSW. Provisions of the Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.
