## Common name

A guinea flower

## Family

Dilleniaceae

## Where found

**Forest** and **heath**. Coastal north from near Kioloa and south of Tura Beach. Rarely in the ranges.

## Notes

**Shrub** to 0.4 m high or sprawling. Stems hairless except for hairy new growth with **simple** hairs. Leaves clustered, 0.3–2.14 cm long, 0.3–0.7 mm wide, surfaces covered in soft hairs with simple hairs, to hairless, margins often curved upwards, tips blunt. Flowers with 5 yellow **petals** each 3.4–12.6 mm long. **Stamens** 8–12, in groups around the **carpels**. Carpels 3, hairless. **Sepals** hairless, rarely hairy with short hairs towards the tips. Flowers single at the bases of the leaves, and on the ends of short shoots, stalkless. Flowers Winter to Summer.

*Hibbertia fasciculata* var. *prostrata* in VICFLORA (accessed 21 February 2021)
