## Common name

Tiny Pennywort

## Family

Araliaceae

## Where found

**Forest, woodland, heath**, cleared areas, and gully floors. Western Slopes.

## Notes

**Erect annual** herb to 0.09 m high, usually grey-green or often purplish tinged. Stems often branching from the base, sparsely hairy to hairless. Leaves **alternating** up the stems, kidney-shaped, 2–10 mm in diameter, shallowly 3–5-lobed or lobed to about midway; the lobes **entire** or 3-toothed, surfaces hairless or with a few long scattered hairs on one or both surfaces. Flowers small, with 5 white to purple **petals**. **Umbels** 2–3 mm in diameter, 3–15-flowered, with a stalk 2–10 mm long. Flowers Sep.–Nov.

Family was Apiaceae.
