Common name

Common morning glory

Family

Convolvulaceae

Where found

Urban bushland, agricultural areas, roadsides, gardens, fence-lines, waste areas, and along streams. Coastal north from Ulladulla. Canberra.

Notes

Introduced annual herb with twining stems, moderately hairy. Leaves **alternating** up the stems, 2–10 cm long, 20–100 mm wide, tips pointed, bases **cordate**, margins **entire** to 3-lobed, surfaces **appressed**-hairy. Flowers white, purplish violet or violet blue, with a paler centre, funnel-shaped, 20–40 mm in diameter, with 5 lobes. **Sepals** free from each other, less than 15 mm long, tips pointed. Flowers in 1–3-flowered clusters, occasionally more. Flowering throughout the year.

General Biosecurity Duty all NSW.
