

Plants of South Eastern New South Wales

Flower head and leaves. Leafy stems. Photographer Jackie Miles, Mbrton National Park

Flowering branches. Photographer Jackie Miles, Barren Grounds

Flower head, seed 'hut' and leaves. Photographer Don Wood, Booderee National Park, Jervis Bay

Common name

Broad-leaf drumsticks

Family

Proteaceae

Where found

Forest and **heath**. Coastal. Ranges and tablelands north of the Kings Highway. Occasionally elsewhere.

Notes

Shrub to 1.5 m high. Hairless except for the young shoots. Leaves **alternating** up the stems, 5–11 cm long, usually **dissected**, the undivided portion 2–5 cm long, **segments** 3–5 mm wide, tips not sharp. Rarely the leaves not divided into segments and then the leaves 5–9 cm long, 3–4 mm wide. Individual flowers yellow, 10–12 mm long, tubular, with 4 **spreading** lobes, hairless. Flower clusters many-flowered, **cone**-like, more or less round. Seeding **cones** more or less round, 10–16 mm in diameter. Flowering: spring to early summer.

Protected NSW.
