Flowering plant. Photographer Richard Spellenberg, California, USA

Common name

Narrow Leaved Cudweed

Family

Asteraceae

Where found

Woodland and **grassland**. Canberra and tablelands.

Notes

Introduced annual herb to about 0.2 m high, whitish- or greyish-**cottony** hairy. Leaves **alternating** up the stems, 0.5–2 cm long, about 1 mm wide, somewhat rigid and **erect**, margins rolled down. Flower **heads** about 2.5–3.5 mm long, with 14–21 **florets** per flower **head**. Bracts tightly **appressed** to the flower heads mainly translucent, with greenish midribs, and brownish or purplish translucent tips. Outer **bracts** with cottony hairs on the **midrib**. Flower heads in clusters of about 2–12, surrounded by leaves to about twice the length of the clusters. Flowers Nov.–Dec.
