

Plants of South Eastern New South Wales

Common name

None

Family

Loganiaceae

Where found

Moist **heath** and damp places. North of Nowra. Coast, ranges, and tablelands.

Notes

Perennial herb, usually to 0.10 m high, or **prostrate** to sprawling. Stems sparsely to moderately hairy; with minute, more or less **appressed**, hairs. Leaves opposite each other, sometimes in a basal **rosette**, 0.4–1 cm long, 0.7–2.5 mm wide, tips pointed; margins usually curved down; surfaces hairless or hairy. Flowers white, sometimes yellowish in the throat, 3–5 mm long, tubular, the tube hairless inside, with 4 lobes each about 2 mm long. Flowers in small leafy clusters. Flowering: mostly spring–autumn.
