

# Plants of South Eastern New South Wales

## Common name

Sublime Point pomaderris

## Family

Rhamnaceae

## Where found

Dry **forest** and heathy **woodland**. Known only from one site at Sublime Point, north of Wollongong.

## Notes

**Shrub** to 2 m high. Young stems hairy with greyish **stellate** hairs (needs a hand lens or a macro app on your phone/tablet to see). Leaves **alternating** up the stems, 1.5–3 cm long, 3–8 mm wide, upper surface hairless, lower surface hairy with greyish stellate hairs, **lateral veins** apparent, with sparse, **appressed** greyish or yellow to rusty **simple** hairs and greyish stellate hairs, looping and not reaching the margins, margins curved down and **entire** to more or less wavy. Flowers cream to pale yellow, mostly about 2 mm long, with 5 **sepals** falling early, and 5 **petals** on most flowers. Flowers in narrow many-flowered branched clusters. Flowers September.

Endangered NSW. Provisions of the NSW Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.
