Flowering stems. Photographer Don Wood, north of Tathra

Flowering tree. Australian Plant Image Index, photographer Murray Fagg, Australian National Botanic Gardens, Canberra, ACT

Common name

A pomaderris

Family

Rhamnaceae

Where found

Forest, **shrubland**, and rocky sites. Coast and ranges, south from the Tuross River.

Notes

Tree or **shrub** to 9 m high. Branchlets with long **spreading** rusty **simple** hairs over a short whitish **tomentum**. Leaves **alternating** up the stems, 0.6–2 cm long, 5–14 mm wide, upper surface pale to mid-green, densely covered with minute **stellate** hairs (needs a hand lens or a macro app on your phone/tablet to see); lower surface greyish, densely stellate-hairy, **lateral veins** either obscure or looping to the inside and not reaching the leaf margins, tips broadly blunt. Flowers yellowish, mostly about 2 mm long, with 5 **sepals**, 0 **petals**, in branched many-flowered clusters.
