## Common name

Lacy pomaderris, Small leaf pomaderris

## Family

Rhamnaceae

## Where found

Wet **forest**, stream banks, and gullies. Tablelands in Tinderry Nature Reserve east of the ACT. Ranges south from east of Nimmitabel.

## Notes

**Shrub** to 3.5 m high. Branchlets densely rusty **stellate** hairy (needs a hand lens or a macro app on your phone/tablet to see). Leaves **alternating** up the stems, often almost opposite each other, 0.2–1.1 cm long and 1.5–8 mm wide, tips blunt to notched, upper surface dark green, sparsely hairy with **simple** or stellate hairs; lower surface whitish with dense stellate hairs, some hairs along the **veins** rusty, **lateral** veins obscure, tips blunt to notched, margins flat or curved down. Flowers cream to yellowish, with 5 **sepals** each 1.4–1.6 mm long, and 0 **petals**, single or in small clusters.

Endangered NSW. Provisions of the NSW Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.
