

Plants of South Eastern New South Wales

Common name

A pomaderris

Family

Rhamnaceae

Where found

Heath and stunted **shrubland** on ridges and headlands. Coast and ranges north of Bulli Lookout.

Notes

Shrub to 3 m high or sprawling. New growth hairy with greyish to rusty long shaggy **simple** hairs overlying greyish **stellate** hairs (needs a hand lens or a macro app on your phone/tablet to see). Leaves **alternating** up the stems, 1–2 cm long, 1.5–5 mm wide, upper surface hairless, smooth; lower surface hairy with greyish or yellow-rusty long shaggy simple hairs and dense white-greyish stellate hairs (needs a hand lens or a macro app on your phone/tablet to see), **lateral veins** obscure, margins curved down to occasionally rolled down. Flowers cream, mostly about 2 mm long, with 5 **sepals**, and 0 **petals**, in short branched clusters.
