## Common name

Giant triggerplant, Tree triggerplant

## Family

Stylidaceae

## Where found

**Forest, heath**, and rocky places. Coast and ranges.

## Notes

**Shrub** or **perennial** herb to 1.50 m high. Leaves **alternating** up the stems, crowded, 1–8 cm long, about 1–2 mm wide, margins often rolled down, surfaces hairless. Flowers pale pink to white, sometimes spotted darker pink, 10–15 mm in diameter, with a short tube and 4 **petals**, and a hinged column 6–7 mm long sensitive to movement, arising from the centre of the flower. Flowers in elongated branched clusters. Flowers Spring to Summer.

Vulnerable Vic.
