

# Plants of South Eastern New South Wales

Flowers. Photographer Jackie Miles, Morton National Park

Leaves and base of stem. Photographer Jackie Miles, Fitzroy Falls area

Flowering plant. Photographer Don Wood, Beecroft Peninsula, Jervis Bay, NSW

## Common name

Narrow-leaved triggerplant

## Family

Stylidaceae

## Where found

**Forest**, **heath**, and moist sites. Coast, ranges, and tablelands, mostly north from near the Kings Highway. Occasionally elsewhere.

## Notes

**Perennial** herb to 0.3 m high. Flower stalks reddish, at least at the base. Leaves tufted, 2–5 cm long, less than 1 mm wide, margins often curved upwards and finely toothed, surfaces hairless. Flowers pink to deep pink, 5–8 mm in diameter, with a short tube and 4 **petals**, and a hinged reddish column sensitive to movement, arising from the centre of the flower. Flowers in elongated clusters. Flowering: April–June and October–January.
