Flowering plant. Photographer Jackie Mles.

Common name

Glandular Pink-bells

Family

Elaeocarpaceae

Where found

Forest, heath, and rocky areas. Ranges and tablelands south from Budawang National Park. ACT. Kosciuszko National Park. Occasionally elsewhere.

Notes

Shrub to 1 m high. Stems cylindrical, often ridged, hairy. Leaves **alternating** up the stems, rarely irregularly opposite each other, variable in shape, 0.2–2 cm long, usually less than 5 mm wide, tips pointed or blunt, and curved upwards, margins toothed, and flat to rolled down, both surfaces usually with fine, white hairs and **glandular** hairs. Flowers deep lilac-pink, with 4 **petals** 6–11 mm long. Petals and **sepals** sometimes persistent at the seeding stage. Flowers single or paired, on stalks 3–7 mm long. Flowering: mostly October–January

Family was Tremandraceae.

All native plants on unleased land in the ACT are protected.
