

Plants of South Eastern New South Wales

Flowering stem. Photographer Barry Rice, California, USA

Flowering stems. Photographer Don Wood, Bomaderry Creek Regional Reserve near Nowra

Common name

Asian bladderwort

Family

Lentibulariaceae

Where found

Stream banks, rocky stream beds, and shallow water. Coastal north from the Nowra district.

Notes

Annual or sometimes **perennial** herb, to 0.3 m high, **stoloniferous**. Insect traps on the 'roots', **stolons**, and leaves. Leaves to 5 cm long, 1.5–6 mm wide. Flowers usually lilac or violet, rarely wholly white, 5–8 mm long, the lower lip usually paler, more or less streaked with darker purple, and often with a blue margin. Flowers in a single cluster of 2–10 flowers. Flowering: most of the year.
