

Plants of South Eastern New South Wales

Flowering plants. Photographer Peter Greenaway,
near Sydney

Common name

A Velleia

Family

Goodeniaceae

Where found

Damp situations in **heath**. Chiefly in the Sydney area and north from there. Blue Mountains. Occasionally elsewhere.

Notes

Perennial herb, flowering stems to 0.50 m high. Almost hairless. Leaves in a basal **rosette**, 3–18 cm long, 10–40 mm wide, margins toothed to **dissected** with the **terminal** lobe much larger than the other lobes. Paired leaf-like **bracteoles** at each branch of the flowering stems. Flowers 10–15 mm long, yellow, obscurely spurred, hairy on both surfaces, tubular, the tube split, with 5 lobes, the lobes notched at the tips. Three **sepals** 4–8 mm long. Flowering: chiefly August–April.
