

Distribution by botanical region - New South Wales

The botanical regions adopted for New South Wales are those used by the National Herbarium of New South Wales.

The botanical region characters should be used carefully. If a specimen comes from near the boundary between two or more regions, select several regions to allow for range extensions or geographic imprecision.

Distribution data for this character were derived from the *Flora of New South Wales* vol. 2 ed. G. Harden (1991) and the Australian National Herbarium specimen database.

North Coast

Covers the northern part of the coastal region of New South Wales.

Central Coast
