

# Plants of South Eastern New South Wales

Flowering stem. Australian Plant Image Index, photographer Murray Fagg, Blue Mountains

## Common name

None

## Family

Ericaceae

## Where found

Damp situations on sandstone rock ledges between 700-1100 m altitude. Blue Mountains.

## Notes

**Shrub** to 0.45 m high. Branches with prominent leaf scars. Branchlets hairy. Leaves crowded, 0.33–0.94 cm long, 2–6.2 mm wide, thick, flat to concave in cross section, bases **cordate** to more or less **auriculate**, margins **entire** and rolled upwards, tips pointed and with a long hard tip. Flowers white, tubular, the tube 1.2–3.5 mm long, with 5 **spreading** lobes each 2.4–5 mm long. Flowers single at the base of the crowded leaves. Flowering: October–January.

Family was Epacridaceae.
