

# Plants of South Eastern New South Wales

## Common name

A grevillea

## Family

Proteaceae

## Where found

Heathy **woodland** margins or moist low **heath**. Kanangra Boyd National Park. Ranges and tablelands east of Braidwood.

## Notes

**Shrub** to 0.4 m high or **prostrate**. **Rhizomatous**. Leaves **alternating** up the stems, 1–4 cm long, mostly 2–6.5 mm wide, margins abruptly bent down, upper surface dotted, **midvein** and the **intramarginal veins** rough to granular, lower surface exposed, somewhat **silky** except for the **midvein**. Flowers with 4 '**petals**' joined together in pairs, '**petals**' white to pale pink, hairy outside, mostly hairless inside. **Gynoecium** 6.5–8.5 mm long, **style** strongly curved. Flowers in **erect** clusters. Flowers August–February.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.
