

Plants of South Eastern New South Wales

Flowering stem. Photographer Arthur Chapman, Goonoo State Forest near Dubbo

Shrub. Photographer Arthur Chapman, Goonoo State Forest near Dubbo

Common name

A grevillea

Family

Proteaceae

Where found

Dry **forest**. North from Bungonia. Mainly ranges, tablelands, and Western Slopes.

Notes

Shrub to 1 m high. Tips of the leaf lobes spiny. Leaves **alternating** up the stems, 3–10 cm long, divided, often divided again once or twice, **ultimate** lobes 0.5–5 cm long, 0.8–3.5 mm wide; margins often angularly abruptly bent down or sometimes more smoothly rolled down, sometimes concealing the **silky** lower surface. Flowers with 4 '**petals**' joined together in pairs, '**petals**' white, cream or pale green, **appressed** hairy outside, hairless inside. **Gynoecium** 3.8–5.8 mm long; **style** white, cream or pale green, hairless. Flower clusters more or less cylindrical, 1.0–2.8 cm long. Flowering: winter to spring.

In the absence of specific information, seeds of all species of *Grevillea* have been keyed as having one **wing**.

Occasionally intergrades with *Grevillea ramosissima* subsp. *ramosissima*.
