

Plants of South Eastern New South Wales

Flowering stem. Photographer Don Wood, Morton National Park

Common name

Narrow-leaf drumsticks

Family

Proteaceae

Where found

Forest and **heath**. Coast north from Ulladulla. Ranges and tablelands north from Tallaganda National Park SW of Braidwood.

Notes

Shrub to 3 m high. Stems hairless. Leaves **alternating** up the stems, 4–15 cm long; finely divided, the **ultimate segments** cylindrical, often 2–3 cm long, tips pointed but not sharp. Individual flowers hairy, yellow, 10–15 mm long, tubular, with 4 **spreading** lobes. Flower clusters many-flowered, **cone**-like, more or less round. Flowering: spring. Seeding **cones** oval to round, 12–25 mm in diameter.

Protected NSW.
