

# Plants of South Eastern New South Wales

Flowering branches. Photographer Don Wood, Australian National Botanic Gardens, Canberra, ACT

Flowering branches. Australian Plant Image Index, photographer A Lyne, Yaouk Peak south west of the ACT

Shrub. Australian Plant Image Index, photographer A Lyne, SSW of Mt Kelly south west of the ACT

## Common name

Namadgi tea-tree

## Family

Myrtaceae

## Where found

**Woodland** and **shrubland** on exposed rocky ridges or mountain tops, at high altitude. Southern ACT and mountain peaks near the southern ACT.

## Notes

**Shrub**, **prostrate** or to 1 m tall. Bark smooth and shed in strips or flaky layers, or rough and finely fissured. Stems hairy, becoming hairless. Leaves aromatic when rubbed, **alternating** up the stems, 0.3-0.9 cm long, 1.5-3.7 mm wide, both surfaces **silky**, silvery to greyish green, or occasionally more or less hairless; tips pointed; bases tapering into a stalk about 1 mm long. Flowers with 5 white to pink **petals** 2.5-3 mm long, single or in pairs. Flowers Summer. Nuts 2–2.5 mm in diameter, hairy, falling early.

All native plants on unleased land in the ACT are protected.
