Common name

Veined pomaderris

Family

Rhamnaceae

Where found

Open **forest**, **shrubland**, rocky sites, and near streams. ACT, Tablelands in Tallaganda State Forest. Ranges south from Deua National Park. Coastal south of Pambula.

Notes

Shrub to 4 m high. New growth and young stems covered with fawn to golden or rusty **simple** and **stellate** hairs (needs a hand lens or a macro app on your phone/tablet to see). Leaves **alternating** up the stems, 2–5 cm long, 10–35 mm wide, upper surface hairless; lower surface densely hairy with whitish or pale to golden hairs, often obscuring the underlying stellate hairs. Hairs simple and mostly lying in the same direction; **lateral veins** pale brown to rusty, looping to the inside and not reaching the leaf margins, tips mostly blunt, margins flat or weakly wavy. Flowers with 5 white to yellow **sepals** 1.2–1.8 mm long, falling early, and 0 **petals**, in large many-flowered branched clusters 30–50 mm long.

All native plants on unleased land in the ACT are protected.

Rare Vic.
