

Plants of South Eastern New South Wales

Common name

Carrington Falls pomaderris

Family

Rhamnaceae

Where found

Open grassy **forest**, **shrubland**, and near streams. North of Fitzroy Falls Reservoir and above Carrington Falls (south-east of Robertson).

Notes

Shrub or tree to 3 m high. Young stems with **appressed**, white or silvery to rusty **simple** hairs mixed with white **stellate** hairs (needs a hand lens or a macro app on your phone/tablet to see). Leaves **alternating** up the stems, 3.6–6 cm long, 14–22 mm wide, upper surface green and hairless, lower surface moderately hairy with loosely appressed, white-silvery simple hairs and dense white stellate hairs, tips pointed or with a long drawn out tip, margins **entire**, flat or slightly curved down. Flowers cream to yellow, externally hairy with loosely appressed, silvery simple hairs and dense stellate hairs, with 5 **sepals** each 1.8–2.0 mm long, and 5 **petals** each 1.7–1.9 mm long, in many-flowered clusters of 20–200 flowers. Flowering: July to November.

Critically endangered NSW. Provisions of the NSW Biodiversity Conservation Act 2016 No 63 relating to the protection of protected plants generally also apply to plants that are a threatened species.

Sensitive Species NSW.
