## Common name

Corrugated sida, Variable sida

## Family

Malvaceae

## Where found

Dry **forest**, **woodland**, grassy areas, and disturbed sites. Coast, ranges, and tablelands, north of Kiama. Western Slopes. Occasionally elsewhere.

## Notes

**Perennial** herb, **prostrate** to sprawling, to 30 cm diameter. Stems **stellate** hairy (needs a hand lens or a macro app on your phone/tablet to see) to hairless. Leaves more or less **alternating** along the stems, 1-3 cm long, 7-30 mm wide, stellate hairy, upper surface dark green to grey-green, lower surface paler with a denser pubescence, sometimes almost scaly, margins toothed or scalloped. Flowers 4-7 mm long, with 5 yellow **petals** 3-7 mm long, in clusters of 1-4 flowers. Flowers most of year.

All native plants on unleased land in the ACT are protected.
