Common name

Smooth Solenogyne

Family

Asteraceae

Where found

Dry **forest**, **woodland**, and grassy areas. Widespread.

Notes

Perennial herb to 0.1 m high. Flower stalks robust, about 0.5–1 mm in diameter. Plants hairless or with very fine hairs. Leaves basal, 2–10 cm long, 5–17 mm wide, tips blunt, surfaces hairless with fringed basal margins, or very sparsely hairy with fine hairs, margins with 12–30 teeth or scallops. Flower **heads** green, often tinged purple to mauve or magenta, 3–7 mm in diameter, hemispherical. **'Petals'** pinkish, minute. Flower heads single. Flowering: spring–summer. **Bracts appressed** to the flower heads **erect** at the seeding stage.

All native plants on unleased land in the ACT are protected.
