## Common name

Mountain velleia

## Family

Goodeniaceae

## Where found

**Forest, woodland**, moist **grassland**, cold mountain valleys, permanently moist soils, and swamps. ACT, the mountains to the west, and Kosciuszko National Park. Mountains on the tablelands south of the Kings Highway. Western parts of the ranges.

## Notes

**Perennial** herb to 0.15 m high, hairless or hairy. Leaves basal in a **rosette**, 1–8 cm long, 5–30 mm wide, tips rounded, surfaces variably hairy or becoming hairless, margins toothed or **entire**, usually conspicuously fringed at least when young. Flowers to 10 mm long, 4–8 mm in diameter, yellow, obscurely spurred, hairy outside and inside, tubular, the tube split, with 5 lobes, the lobes notched at the tips. Three **sepals** 3–6 mm long. Flowers clustered towards the centre of the rosette, the stalks usually shorter than the leaves. Flowering: mostly November–February.

*Goodenia montana* in VICFLORA.

All native plants on unleased land in the ACT are protected.
