

Plants of South Eastern New South Wales

Line drawings. b. plant: seed. E Mayfield, National Herbarium of Victoria, © 2021 Royal Botanic Gardens Board

Common name

Winged New Holland Daisy, Rough Fuzzweed

Family

Asteraceae

Where found

Woodland and **shrubland**. Western Slopes.

Notes

Annual, **biennial**, or **perennial** herb to about 0.3 m high, sparsely hairy to hairy with stiff hairs, often sticky. Leaves **alternating** up the stems, 0.3–3.5 cm long, 1–8 mm wide, flat or often longitudinally folded, margins **entire**, or with 1–3 small teeth near the tips, tips pointed. Flower **heads** 5–6 mm long, with 15–20 pale mauve to purple '**petals**' each 1–2 mm long, and yellow centres. Flowers in open clusters at the tops of the stems. Flowering: most of the year.

Vulnerable Vic.

Definite identification of most species of *Vittadinia* depends on microscopic examination of the seeds.

PlantNET description: <http://plantnet.rbg Syd.nsw.gov.au/cgi-bin/NSWfl.pl?page=nswfl&lvl=sp&name=Vittadinia-pterochaeta> (accessed 4 February, 2021)

Description above partly based on the description in Cunningham, G.M., Mulham, W.E., Milthorpe, P.L. & Leigh, J.H. (1981 and later printings), *Plants of Western New South Wales*, page 660
