

Plants of South Eastern New South Wales

Flowers and leaves. Australian Plant Image Index, photographer Murray Fagg, Australian National Botanic Gardens, Canberra, ACT

Flowers and leaves. Australian Plant Image Index, photographer Murray Fagg, Australian National Botanic Gardens, Canberra, ACT

Common name

Round-leaved zieria

Family

Rutaceae

Where found

Forest, heath, rocky outcrops, and rocky river banks. Mainly Kanangra Boyd National Park and east of Bathurst. Rarely elsewhere.

Notes

Shrub to 2.5 m high. Stems ridged, **glandular** warty, hairy with **simple** hairs between the leaf bases, becoming hairless. Leaf bases often continue down the stems. Leaves aromatic when rubbed, opposite each other, mostly **compound**, with 3 leaflets, each 0.25–1.2 cm long, 2–6.5 mm wide, tips more or less rounded, notched to **cordate**, and **mucronate**, margins more or less scalloped; both surfaces dotted with oil **glands** and more or less hairless, upper surface dark green, lower surface paler. Flowers white to pink, with 4 **petals** each 2.5–3.5 mm long, and with 4 **stamens**. Flower clusters usually longer than the leaves, usually 5–9-flowered. Flowering: spring to mid–summer.

Rare Vic.
