

Plants of South Eastern New South Wales

Flowering stems. Photographer MelitaMiner, Jerrabomberra, ACT

Flowering plant. Photographer Don Wood, north of Bega

Pod and leaves. Photographer Tony Rodd, Lake Illawarra

Common name

Zornia

Family

Fabaceae

Where found

Open **forest**, **woodland**, and grassy sites. Coast, ranges, tablelands, and ACT. Rare elsewhere.

Notes

Perennial herb, to 0.3 m tall, or **prostrate** to sprawling, hairless or sparsely hairy, and more or less **gland**-dotted. Leaves **alternating** along the stems, **compound**, with 2 leaflets, each 0.8-3 cm long, 2-10 mm wide, the lower leaflets more or less oval, the upper leaflets lance **head** shaped to **linear**. Flowers 5-12 mm long, pea shaped, with 5 **petals**, 2 joined together to form the **keel**, yellow to orange with dark red blotches. Flowers Summer to Autumn.

All native plants on unleased land in the ACT are protected.
