

Australian Tropical Rainforest Plants - Online edition

Family Profile

Hanguanaceae

Family Description

A monogeneric family which has been regarded as consisting of a single species, Backer (1951) but more recently suggested to consist of five or more species. Rudall et al (1999). Found in Ceylon, SE Asia, Malesia and Australia.

Genera

Hanguana - A monotypic genus, Backer (1951) or a genus of five or more species. Rudall et al. (1999); probably only one species in Australia. Hewson (1986).
