Distribution and Ecology
Endemic to NEQ, widespread in the area. Altitudinal range from near sea level to 1150 m. Grows in well developed rain forest on a variety of sites but is probably more common in upland and mountain rain forests and probably reaches its best development on soils derived from basalt.

Family Profile
Opiliaceae

Family Description
A family of nine genera and about 30 species, pantropic; two genera occur naturally in Australia.

Genera
Cansjera - A genus of three species in Asia, Malesia and Australia; one species occurs naturally in Australia. Hiepko (1984a, 1984b).
